WORK EXPERIENCE

Web Developer/Shipment Planner
Textile Channel

09/2021 - Present   *Karachi, Pakistan*

Textile Channel *(TC) aspires to be a well-known Pakistani supplier of high-quality home textiles and knitted garments.*

Achievements/Tasks

- A Real World Project that received an excellent business response. The last webpage was built on PHP code with old coding standards , but now I have converted it to a new 100% React website with full responsiveness.
- Working directly with the Director/CEO of this company to conceptualize and implement front-end designs and functionality to optimize UI/UX on existing website content.
- Additionally, I plan shipments. Along with my management, it is my obligation to administer and maintain the entire business process of the ERP system in this company.

Personal
Qualification

These are my experience.

Achievements/Tasks

- Thanks to my 3+ years of customer service experience, I can easily communicate with clients and coworkers to establish the requirements to complete projects in a professional and timely manner.
- The fundamentals of cross-browser development, performance optimization, SEO, code debugging and unit testing, and mobile-first design concepts are all covered.
- I favor the Functional Component approach in React over class-based components. React Hooks are really useful for understanding code and are manageable in large projects since React version 16.8.
- Best practices for React Hooks, ES6++ concepts, Next JS, Redux, Restful APIs, asynchronous, JSON, and AJAX, as well as NPM packages and GitHub are all covered.
- Ensure that components are optimised for cross-browser and cross-platform compatibility.
- Strong command of libraries like Material UI, Tailwind CSS, and Bootstrap, as well as CSS pre-processors like Sass/Less.
- I also work as a freelancer on Upwork and fiverr.
